

CHOPPY AND THE UNIVERSE

Centre the design and then trace onto the fabric.

This is a good design for the beginner. Why? Well that whole 'universe' could be glued in place just leaving the dog to be stitched. Even the border could be stars glued into place

The patches, ears and tail of dog - Stem Stitch 3 strands of DMC cotton

Outline and collar - Stem stitch 2 strands of DMC cotton

Universe - Straight Stitch and Back Stitch

Sun -centre Chain Stitch, **Rays** - Straight Stitch

Border - Straight Stitch held in place with a small CrossStitch

NB When stitching the patches, ears and tail remember that you want this to look like dog fur. So stitch in one direction as much as possible.
